Professional Summary

MCA student with hands-on experience building AI-powered and full-stack web applications using Python, Flask, React, MongoDB, and cloud deployment. Experienced in REST API development, authentication, database design, and integrating LLMs such as Gemini into AI-powered applications. Passionate about backend engineering, AI systems, and scalable web development.

Key Skills

- **Programming Languages:** Python, JavaScript, HTML5, CSS3
 - **Frontend:** React, Vite, Tailwind CSS
 - **Backend:** Flask, REST APIs, JWT Authentication
 - **Database:** MongoDB, MySQL
 - **Tools:** Git, GitHub, Docker, Postman
 - **Deployment:** Vercel, Render, AWS EC2
-

Education

BCA – Bachelor of Computer Applications

Don Bosco Degree College, Chitradurga (2022–2025)

Affiliated to Davanagere University, Davanagere

- Developed expertise in Python and Vanilla JavaScript through coursework and hands-on projects.
- Gained proficiency in computer science fundamentals, including programming, databases, and web development.
- Completed full-stack projects demonstrating backend API development and frontend application design.

CGPA: 7.6 / 10

MCA-Master of Computer Applications

GM University Davanagere (2025–2027)

- Coursework in software engineering, data structures, algorithms, database management systems, operating systems, and web technologies.
 - Gained hands-on experience in full-stack application development using Python, Flask, React, MongoDB, MySQL, and REST APIs through academic and personal projects.
 - Built scalable web applications by applying backend development, database design, authentication, and cloud deployment concepts.
 - Developed practical experience in AI application development by integrating LLMs and modern development tools into real-world software projects.
-

Projects

1. AgriLens AI | <https://agrilensai.onrender.com/>

- Developed an AI-powered crop disease detection platform using React and Python with image, text, and voice-based analysis.
- Integrated the Gemini API to generate disease diagnosis, treatment recommendations, and farming insights.
- Built RESTful APIs, integrated weather data, and containerized the application using Docker.

2. Cora – Movie Recommender App | <https://cora-b6o6.onrender.com/>

- Developed a full-stack movie recommendation system using Flask and Vanilla JavaScript.
- Designed RESTful APIs and implemented a content-based recommendation engine.
- Integrated MongoDB and the TMDB API for efficient movie data storage and retrieval.
- Used Git/GitHub for version control and project management.

3. QR Attendance System

Internal Project

- Built a QR code-based attendance management system using Flask and MySQL for institutional use.

- Developed RESTful APIs for attendance tracking, QR validation, and secure data management.
- Designed an automated attendance workflow to improve efficiency and reduce manual record keeping.

4. Varada's Kitchen

<https://varadas-kitchen-oaxa.onrender.com/>

- Developed a responsive full-stack cloud kitchen website using Flask, React, Vite, and Tailwind CSS.
 - Built backend APIs for menu and order management.
 - Deployed and maintained the application on Render.
-

Languages

- Kannada and Telugu [Native]
- English [Fluent]
- Hindi [Beginner]
