

HARI BABU S R

Software Engineer | Full Stack & Cloud Development

Davanagere, Karnataka | +91 8431534540 | haribabusr78@gmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

Software Engineer with hands-on experience building AI-powered and full-stack web applications from concept to deployment. Designed and developed scalable backend APIs, database-driven systems, and intelligent applications using Python, Flask, React, MySQL, MongoDB, Docker, and cloud platforms. Built production-ready projects including AgriLens AI, AI Exam Evaluation System, QR Attendance System, and CORA Movie Recommendation System.

EDUCATION

GM University — Davanagere, Karnataka

Master of Computer Applications (MCA) | Expected August 2027

Relevant Coursework: Generative AI, Machine Learning, Cloud Computing, Data Structures, Algorithms, Software Engineering

Don Bosco Degree College — Chitradurga, Karnataka

Bachelor of Computer Applications (BCA), Davangere University | 2022 – 2025 | CGPA: 7.6

KEY PROJECTS

AI Exam Evaluation System — 2026

- Built an AI-assisted exam evaluation platform that automates answer sheet assessment using OCR and LLM-based grading.
- Designed a two-stage evaluation pipeline combining OCR extraction, answer validation, and AI-powered scoring to improve evaluation consistency.

QR Attendance System — 2025

- Developed a QR-based attendance management system for institutional use using Flask, MySQL, and REST APIs.
- Implemented secure QR validation, attendance tracking, and automated record management to reduce manual attendance processing.

AgriLens — 2026

- Delivered 96% accuracy in crop disease diagnosis for an agricultural companion app, by combining image-based classification with real-time weather alerts for farmers.
- Combined image-based diagnosis with a recommendation engine to deliver actionable, personalized farming advice.
- Built a weather-based crop advisory agent, NL-to-SQL query tool, and Gemini-powered summarizer via FastAPI, backed by PostgreSQL and a glassmorphism HTML/CSS/JS frontend.

CORA Movie Recommendation System — 2026

- Built a full-stack movie recommendation platform using Flask, JavaScript, MongoDB, and the TMDB API.
- Designed REST APIs and implemented a content-based recommendation engine for personalized movie suggestions.

TECHNICAL SKILLS

Languages & Fundamentals: Python, JavaScript, Data Structures & Algorithms, REST APIs, SQL Query Optimization, Git, GitHub

Backend & Database: REST API, Flask, Node.js/Express, PostgreSQL, Redis, JWT Authentication

Cloud & DevOps: Docker, AWS EC2, Render, Vercel, Linux

Frontend: React, Vite, Tailwind CSS

Applied AI/ML: Generative AI, Agentic AI, RAG, Google Gemini API, Vertex AI, OCR

ACHIEVEMENTS & CERTIFICATIONS

- Student Developer, ERP Cell, GM University – Developed QR Attendance, Event Approval, and AI-powered Exam Evaluation systems using Python, Flask, and MySQL.
- Participated in OpenAI Academy x NxtWave Regional 2 Days Offline Buildathon – Karnataka
- Participated in Google Cloud Agentic AI Day
- Participated in Google Developers Group X Built for Bengaluru 30 Hours Offline Hackathon
